

Pipe Capacities

| Diameter of Pipe | Length in Feet Per Gallon |
|------------------|---------------------------|
| 1/8" | 338 |
| 1/4" | 185 |
| 3/8" | 100 |
| 1/2" | 63 |
| 3/4" | 36 |
| 7/8" | 32 |
| 1" | 22 |
| 1-1/4" | 12.8 |
| 1-1/2" | 9.45 |
| 2" | 5.73 |
| 2-1/2" | 4.02 |
| 3" | 2.6 |
| 3-1/2" | 1.95 |
| 4" | 1.57 |
| 5" | 0.96 |
| 6" | 0.66 |
| 8" | 0.39 |
| 10" | 0.24 |
| 12" | 0.16 |
| 14" | 0.12 |
| 16" | 0.1 |
| 18" | 0.07 |

EXAMPLE: If you have a 40-ft. pipe and the diameter is 10 inches, the formula would be as follows:

40-ft. divided by .24 = 166.67 gallons

This is the volume of the pipe, which means you would only need 84 gallons of **RYDLYME Marine** and 84 gallons of water.
